THE REVIEWS ARE IN

I've done 7 or 8 weekly treatments so far and it is working. I'm doing my underarms, legs, and bikini. I still have growth but less hair grows back every week and my legs have whole areas where there is no hair growth at all. I can go an entire week between treatments without shaving my bikini area. I am very fair with very dark, coarse hair so any reduction is a dream come true for me.

- Marianne D.

I am 34 years old and have struggled with facial hair my entire life. My self-esteem was low as a result. After discovering this product online, I decided it was worth a try. After using the KENZZI for four months, I am at a loss for words. The results are tremendous. Please be patient; I know it took a while, but my situation was difficult.

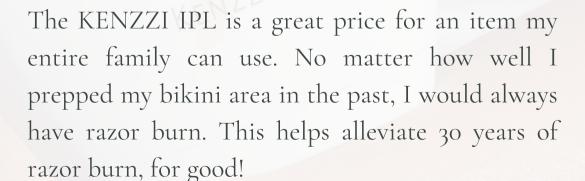

I have not yet completed the full 12 weeks, but I am already seeing great results and a decrease in hair growth. From the first session, I have always used level 5 and repeated 3x over each part. It is not painful at all. I am very happy and impressed with this machine and what my results are after only 4 treatments. I cannot wait to see my results after 12 weeks or more!

- Yzabel

Have been using it once a week for 6-7 weeks under my arms and in my bikini area. Only half the amount of hair is coming back and it's much finer! I naturally have coarse, dark hair. I was skeptical at first, but not now!
