BEN JOHNSON, MD | FOUNDER + CEO

"I created Osmosis to help with the evolution of skincare by moving away from the old paradigm of wounding the skin, and instead focused on eliminating the bottlenecks that prevent your skin from repairing itself. Permanent changes are possible, your skin just needs to be inspired."

- Ben Johnson, MD | Founder + CEO

OUR BRAND

Osmosis is an elite professional skincare and wellness brand that achieves real, lasting results by transforming skin health. This requires patented, advanced technology with a holistic approach.

Our unique philosophy is based on analyzing the skin and body as a whole and treating skin conditions at the source. Osmosis provides skincare professionals with the tools needed to create the ideal environment to inspire permanent changes in their client's skin.

Over 15 years ago, we were inspired by the bold mind of our innovative founder, Ben Johnson, MD, to create non-toxic skincare products and treatments that combine the purity of naturally sourced ingredients with revolutionary, doctor-developed, and scientifically validated formulas. Our clinical trials and before-and-after photos prove that this approach is leading skincare into a new paradigm.

OUR FOUNDER

Dr. Ben Johnson has been an innovator in aesthetic medicine for over 20 years. He began his career by starting one of the first medi-spa chains but quickly pivoted to his passion, investigating and finding solutions for the most challenging skin conditions. Dr. Johnson's outside-the-box approach including his patented technology, paradigm-shifting discoveries and successful clinical trials, have set a new standard of excellence in skincare and wellness.

What makes Osmosis different?

WE THINK HOLISTICALLY

Our approach is based on treating the whole self with a focus on holistically healing, not harming.

- Features patented-ingredients to activate repair
- Uses pharmaceutical-grade delivery systems
- Treats challenging skin conditions no one else can

“

For too long the quest for youthful skin has usually meant using harsh, harmful ingredients that result in temporary benefits and often age the skin faster. I created Osmosis to help people move away from the old idea of wounding the skin and instead embrace the science-based reality that even better results can be had by empowering the skin's innate ability to heal itself.

”

- Ben Johnson, MD | Founder + CEO

OUR PROMISE TO YOU

Transparent formulations, non-toxic ingredients, trusted results backed by clinically proven science.

WHAT DOES IT MEAN TO BE MEDICAL AND HOLISTIC?

1. Results First and Foremost.

By definition, medical skincare lines should be the most active and correcting skincare available. Where Osmosis stands alone is our discovery that merging holistic methods with advanced technology creates more repair than any other strategy.

“Holistic” actually makes scientific sense! It is a well-understood fact that the skin performs best when it is not compromised. Osmosis chooses ingredients that do not burden the immune system with inflammation. Not only does inflammation accelerate aging, but it also reduces the capacity for the skin to maintain its collagen density, DNA, and barrier health.

2. Ingredient Technology Centric.

Osmosis has a remarkable collection of patented and exclusive ingredients that cannot be found elsewhere. This is what separates our results from everyone else’s. One example of this is our liposomal retinaldehyde, which is the most tolerated retinol while also being the most clinically proven and effective collagen stimulator available. Real change occurs when you improve the actual health of the skin without harming it.

3. Barrier Health.

Research has shown that focusing on exfoliating the epidermis everyday causes skin sensitivity, sun sensitivity, and dehydration. This is why we choose to focus on building the health of the skin. Our serums protect the barrier while maximizing the age-reversing repair that is possible with better delivery systems. Osmosis specifically targets the dermal-epidermal junction with patented oxidation repair technology and vital lipids and proteins to encourage a healthier protective barrier while gently driving in the components the skin desperately needs to activate repair.

4. DNA Repair.

Commonly used retinols and acids are proven to cause DNA damage, so we avoid them. DNA health plays an important role in maintaining skin health. Our liposomal retinaldehyde is UVB protective and stabilized, thus dramatically reducing the potential for DNA damage. Osmosis uses advanced DNA repair approaches, including our own patented Zinc Finger Technology and AC-11® that are clinically proven to holistically treat pre-cancerous lesions.

5. Clean Ingredients.

This is becoming more and more important to professionals because toxic and irritating ingredients detract from lasting results. The skin is constantly defending itself from the environment, so it does not need the additional burden of managing skincare toxins. Our clean ingredients have also allowed many of our products to be oncology friendly.

ONCOLOGY FRIENDLY

OSMOSIS SKIN MAPPING™

Osmosis Skin Mapping™ is a revolutionary skincare tool inspired by holistic healing and decades of medical analysis that helps more accurately identify what your skin needs to look healthy and vital.

Unlike one-dimensional skincare, which generally only focuses on what's happening on the surface of the skin, Osmosis Skin Mapping™ is an interactive approach that goes beneath the surface to uncover hidden internal factors, revealing "why" the skin issue has occurred, as well as the solution.

In development for over a decade and accurate on all skin types, Osmosis Skin Mapping™ uses carefully identified "zones" on the face and upper body to pinpoint where imbalances spring and then translates these imbalances into their associated effects on the skin. This cutting edge "inside-out" method is designed to relieve your skin and body of burdensome toxins and inflammation while simultaneously feeding the repair process and creating real, lasting change.

SKINCARE

Transformative Skin Health™

Osmosis non-toxic formulas combine clinically proven, patented ingredients and high-potency, targeted nutrients with clinically validated science to create products that uniquely transform and restore the skin to its true health and vitality. By strengthening the foundation of the skin and activating new repair pathways, we generate real, lasting changes.

Clean, non-toxic ingredients | Free of sodium lauryl sulfate, phthalates, parabens, gluten, artificial colors, and fragrances | Clinically validated | Doctor-developed | Patented formulas and exclusive ingredients | Pharmaceutical-grade delivery systems | Holistic, non-inflammatory approach | Oncology Friendly

Renowned for their ability to help strengthen the immune system and reduce inflammation, our frequency-infused, gold-enhanced elixirs are also said to sharpen mental focus, decrease stress and enhance spiritual well-being.

Why do frequencies matter?

After decades of research, Osmosis has developed a mathematical formula to determine the frequency, or energy signature, of each substance in nature. We program these frequencies into our proprietary frequency device, add our super-nutrient minerals and gold, and then treat the water over an extended period of time. The result is a frequency-enhanced liquid, nutrient-rich and imbibed with minerals and gold, that carries the necessary energy signatures into cells to restore balance and healthy activity.

What's gold got to do with it?

For thousands of years, gold has been used to help heal and support overall health. Renowned for its ability to strengthen the immune system and reduce inflammation, gold is also said to sharpen mental focus, decrease stress, and enhance spiritual well-being. Now, Osmosis Elixirs bring this precious resource to skincare. Delicate 24-karat gold flecks complement each Elixir, bringing the wisdom of this philosophy to life and taking your beauty routine to the next level.

TESTIMONIALS FROM OUR PARTNERS

“

PHILOSOPHY

Osmosis has completely transformed my business. Since starting with them when I returned to the country three years ago (and starting my practice again completely from scratch) I have gone from being a single practitioner to having a staff of six therapists... all of us fully booked out months ahead of time. The philosophy and training are unmatched... and the potential for treatment unlimited! The respect I get from clients by being able to so quickly diagnose and treat the internal causes of their issues is priceless. And most importantly... the products work. It would all be nothing without results and Osmosis delivers. Thank you, Ben, for sharing this groundbreaking philosophy with us, and allowing us to take our work to the next level. Really, my whole business is built on Osmosis.”

- **Adrienne Shosak, Owner**

“

RESULTS

WE LOVE OSMOSIS! Our Spa has been with Osmosis over 7 years. We love the product as it produces long-term dedicated customers. And the reason, our customers get results. Our growth has been substantial and we continue to grow and build new clientele. As a Director, I am responsible for growth, sales and marketing. Osmosis makes it easy. Their website has great tools and better yet, my rep is outstanding to work with. She educates our staff, responds in a timely manner, and she gives us great ideas. They are the only company that invests in our Spa to help my sales grow. And, they make it easy.”

— **Barb Robison, Director**

“

CONFIDENCE

Working with Osmosis keeps me confident that I am offering my clients the very best of what is available in skincare. At times my head will be turned by a new product line, yet none ever deliver the proven results that I am able to provide with Osmosis.”

— **Jenny Geren, Owner**

“

SUPPORT

Osmosis has been a great Spa partner and great addition to our skincare offerings. Virginia is always available for extra support with training new team members, developing specialty services, and moving retail products. Our Estheticians particularly love using Purify, Repair, and Polish in their facial services.”

— **Jackie Fernandez, Spa Director**

“

DRAMATIC CHANGE

I have been using and loving Osmosis for over 7 years. It is such a versatile line, and my clients truly enjoy it as well. It works amazing for acne helping to get the skin clear and under control. And one of my personal favorites & probably the most transformation I have seen is with rosacea. I have been amazed to see the skin change, becoming even in color and texture and greatly decreasing any flare ups related to lifestyle. Osmosis's harmonized water are also wonderful in treating the underlying issue causing these skin conditions, giving clients long term support and consistency with their skin. My Age Management clients also enjoy and see results from their Osmosis products. I would highly recommend Osmosis Pur Medical Skincare for anyone who is looking for dramatic permanent improvement in their skin or their clients.”

- Kim Mann LE, Owner

“

LOYALTY

The Osmosis Philosophy and products reflect who I am as a skin Therapist. My confidence with the products and skin results has continued to build my customer base, and customer loyalty in me as their skin authority.”

- Erica Chandler, Owner

“

GROWTH

Osmosis has allowed me to treat skin conditions with a more targeted treatment approach getting accelerated results. This has grown my service business 20% over the last year.”

- Shawn Paris, Owner

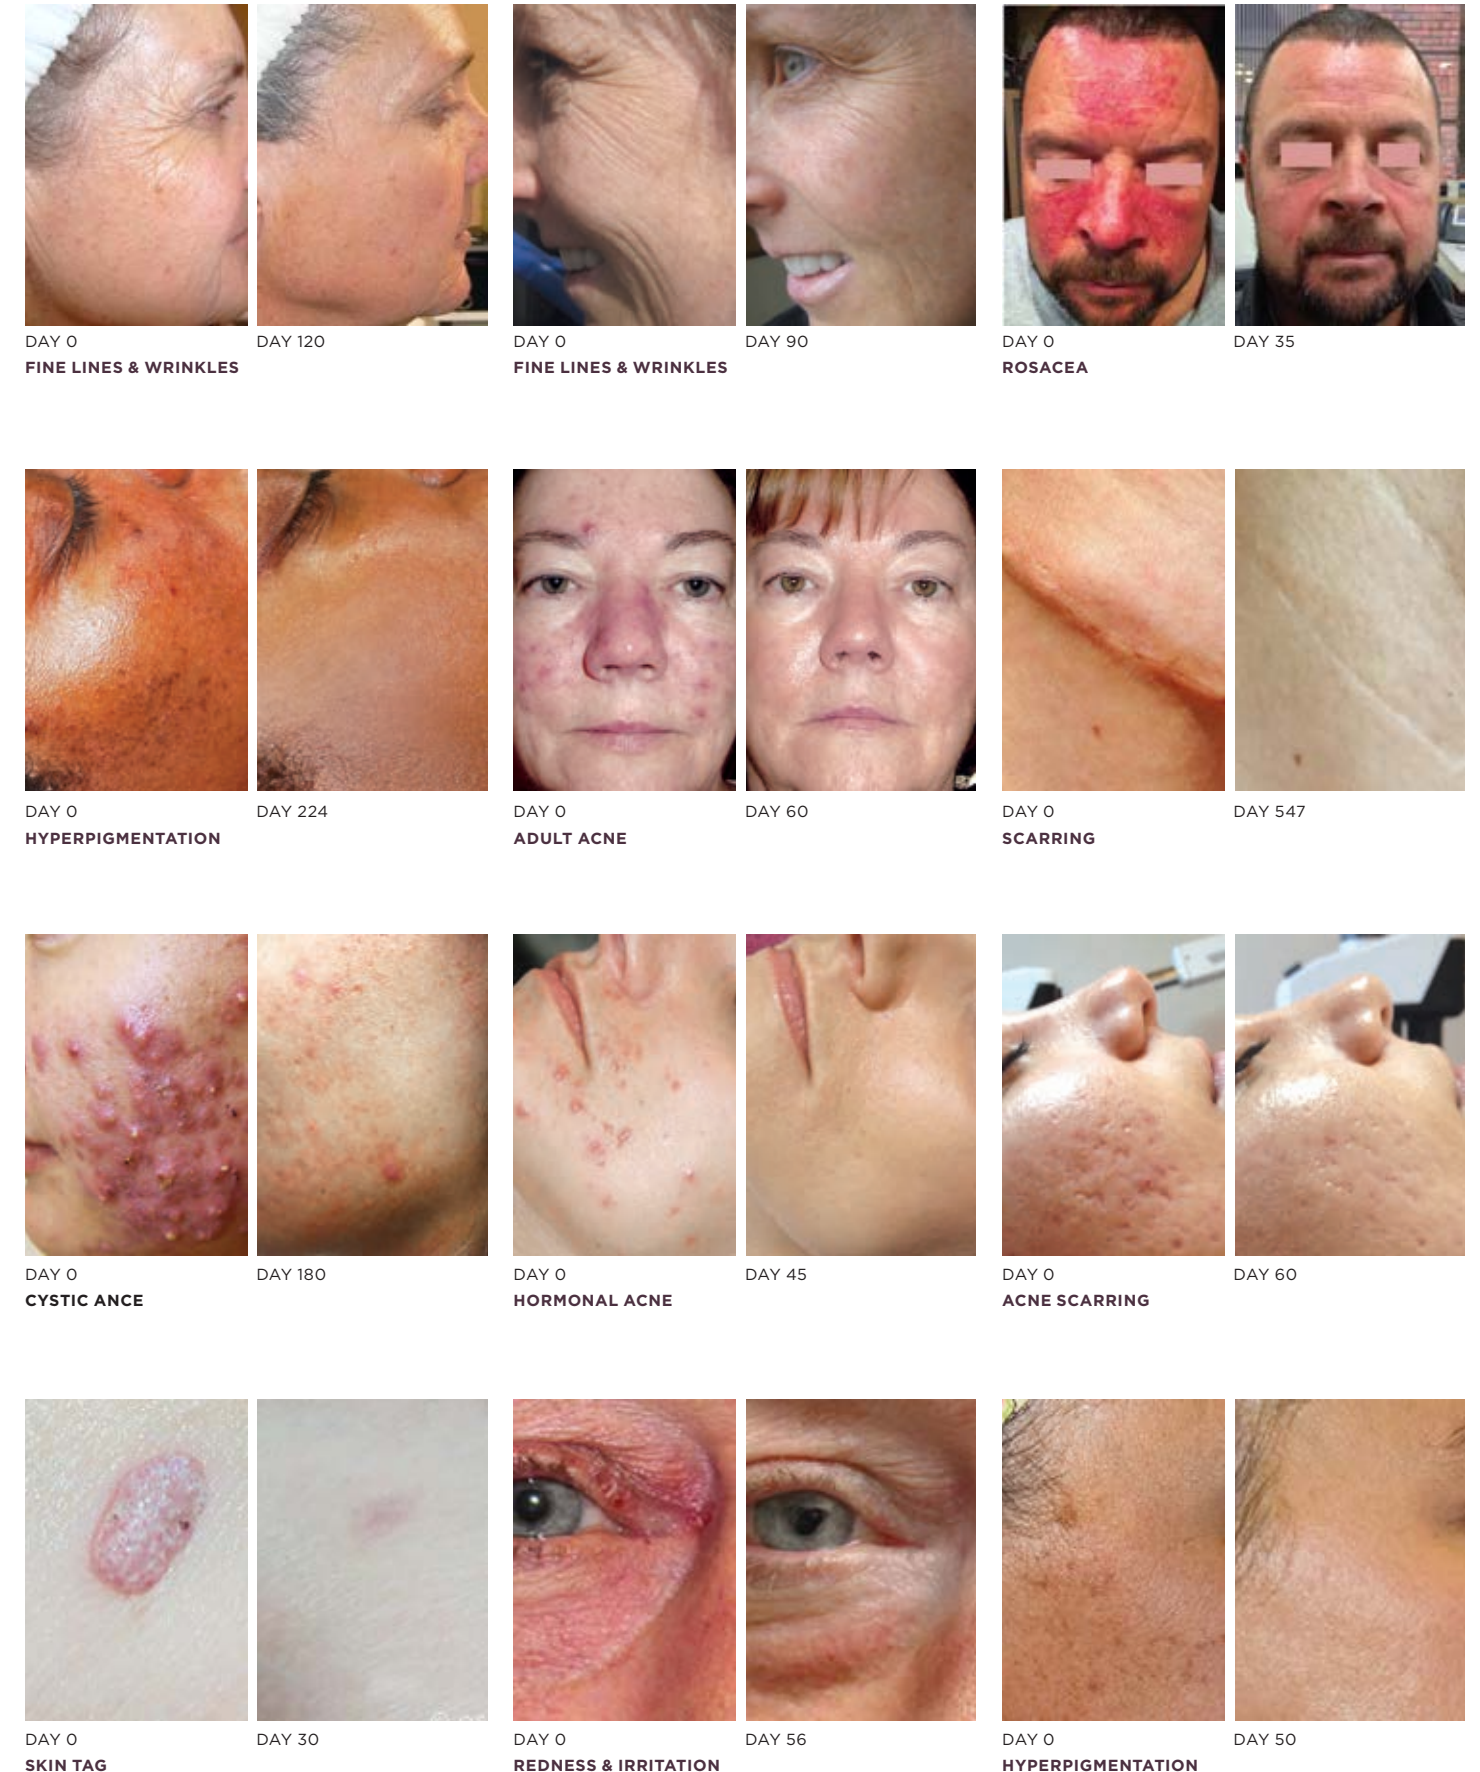

“

HAPPINESS

In my early 20's I developed POCS, Issues with endometriosis and my hormones. This sparked a horrible cystic acne issue. That got progressively worse over the next 5 years. I tried every skin care product on the market. Big name brands like Murad, Mario Badescu, Algenist, amongst a lot of others. When none of those worked I turned to dermatologist grade stuff like Serene and others. Finally, since nothing else was working I decided to give Accutane. That was the worst experience of my life. It's such a dangerous drug, that I will forever regret using. It was so strong that in the mornings my entire skin lips on my lips would peel off. My acne was finally drying but my face was literally cracking and falling apart. I quickly got off of that. After that experience I gave up on everything. I vowed to never spend another dime on anything else. I had decided to just accept my acne and just move on with life. One day my best friend surprised me with an awesome gift certificate to try a facial. I wasn't sure about chemicals and getting back into more products. I reluctantly agreed to go try it. I met Flori and the rest is history. Since the very first visit I saw result. Ten months in I couldn't be happier, my acne is under control and my scars are starting to fade finally. Osmosis has given me the second chance I was looking for. My self confidence has improved tremendously. Best part is, I am comfortable enough going places with no make-up on. That hadn't been an option for about seven years.”
