

THE ART OF CANDLE BURNING

How to get the most out of Iconesse Impressions?

- When burning for the first time, burn the candle until the entire top layer of wax has liquified to the edge of the glass.
- Whilst burning, the wick will form a “mushroom” shape due carbon buildup. After approx. 3 hours of steady burning, put the candle out, wait at least 1 hour until the wax has solidified, and trim the wick to 1/4 length.
- Do not burn the candle for short periods such as half an hour. This isn't enough for the candle to release its full fragrance and the wax won't burn evenly, forming a tunnel through the middle of the candle.
- To stop burning the candle, simply close it with the wooden lid.
- Be sure to reposition the wick vertically before the wax solidifies.
- Before re-lighting the candle, cut off a quarter of the wick to get the most out of your fragrance and avoid any smoke discharge.
- Trim the wick after each burning. Cut it only when the wax has solidified (wait at least 1 hour).

Safety:

- Keep away from all flammable items such as carpets, curtains or tablecloths.
- Keep away from children and pets.
- Do not place candles near sources of heat.
- Avoid burning in drafty areas.
- Keep the wax pool free of wick trimmings, matches and debris at all times.
